IDENTIFIERS *New York (New York)

ABSTRACT

Prepared to provide employers and government agencies with data needed to effectively develop, implement, and analyze Affirmative Action Compliance Programs as required by Revised Order No. 4 of the U.S. Department of Labor Office of Federal Contract Compliance, this booklet specifically covers the following factors enumerated in the Order: (1) the minority population of the labor areas surrounding the facility; (2) the percentage of the female and minority work forces as each compares with the total work force in the immediate labor area; (3) the size of the female and minority unemployment force in the labor area surrounding the facility; and, (4) the general availability of minorities and women having requisite skills in the labor area and in an area from which the contractor can reasonably recruit. To supplement the information contained in this booklet, data on the occupational, sex, ethnic, and racial characteristics of job applicants registered with the New York State Employment Services are available. Nine tables are included along with a New York State Standard Metropolitan Statistical areas map. (Author/AM)

* Documents acquired by ERIC include many informal unpublished *
* materials not available from other sources. ERIC makes every effort *
* to obtain the best copy available. Nevertheless, items of marginal *
* reproducibility are often encountered and this affects the quality *
* of the microfiche and hardcopy reproductions ERIC makes available *
* via the ERIC Document Reproduction Service (EDRS). EDRS is not *
* responsible for the quality of the original document. Reproductions *
* supplied by EDRS are the best that can be made from the original. *

Introduction

This booklet was prepared to provide employers and government agencies with data needed to effectively develop, implement and analyze Affirmative Action Compliance Programs, as required by Revised Order No. 4 of the U.S. Department of Labor's Office of Federal Contract Compliance (see inside front cover).

The booklet supersedes three previous publications that are no longer in print: Labor Force Statistics on Minorities and Women (1973), Women in the Labor Force (1972), and Minority Manpower Statistics (1971).

Periodically updated and localized supplemental information regarding the potential availability of women and minorities having requisite skills is available for use in conjunction with the booklet and may be obtained by contacting the office in your area listed on the inside back cover.

How to use this booklet

This report specifically covers the following factors enumerated in Revised Order No. 4:

- The minority population of the labor area surrounding the facility.
Tables 1 and 1a present the final 1970 Census count for total, female and minority population by Standard Metropolitan Statistical Area (SMSA) and county.
- The percentage of the female and minority work forces as each compares with the total work force in the immediate labor area.
Tables 2 and 2a present the final 1970 Census estimates for the total, female and minority labor force by SMSA and county. Tables 4 and 4a present the final 1970 Census estimates for total, female and minority employment by SMSA and county.
- The size of the female and minority unemployment force in the labor area surrounding the facility.
Tables 3 and 3a present the final 1970 Census estimates for total, female and minority unemployment by SMSA and county.
- The general availability of minorities and women having requisite skills in the labor area and in an area from which the contractor can reasonably recruit.
Table 4b, based on 1970 Census estimates, indicates what proportions of the total employed in selected occupations are minority group members or female.

Supplement Available

To supplement the information contained in this booklet, data on the occupational, sex, ethnic, and racial characteristics of job applicants registered with the New York State Employment Service are compiled for recent periods. These supplements, available on request, are relevant to the following factors enumerated in Revised Order No. 4:

- The general availability of minorities and women having requisite skills in the immediate labor area.
- The availability of minorities and women having requisite skills in an area in which the contractor can reasonably recruit.
- The availability of women seeking employment in the labor area or recruitment area of the contractor.

Employers in both the private and public sectors may find the supplement useful in evaluating the potential availability of women and minorities to fill anticipated vacancies in accordance with the establishment of affirmative action hiring plans in their facilities.

The supplemental data, obtained from the Employment Security Automated Report System (ESARS), contains detailed information on applicants by occupation, sex, ethnic group and race, and is available for counties, SMSA's and the State.

Technical Notes

In this report, minority group members include blacks, Puerto Ricans, and "other races." The Puerto Rican category consists of persons of Puerto Rican birth or parentage and other Spanish-speaking persons; in the racial breakdown, the Puerto Rican category includes blacks, whites, and "other races." "Other races" includes American Indians, Japanese, Chinese, Filipino, Hawaiian, Korean, and any other racial categories not identified in the Census as white or black. Black Puerto Ricans (about 7 percent of all Puerto Ricans) are included in both the black and Puerto Rican categories.

"Disclosure suppression" in Tables 1 through 4a indicates that the Bureau of the Census, in order to prevent disclosure of information about individuals, did not release data when too few individuals were counted in a particular category.
